

Naresh

My name Naresh. I was on dialysis for 10 years. It was quite tiring after coming back from dialysis. I used to go 3 times a week, which was worrying for my family.

Within this period I was called by the hospital for a kidney transplant. When the kidney arrived and was checked by the doctors; they found cancerous cells in the kidney. One of the doctors came and apologised and informed me about the cancerous cells. After 5 years I was called by the hospital coordinator to come to the hospital as soon as possible. After I arrived I had all the tests done. The following morning I was taken to the operation theatre for a transplant. After the operation I was quite poorly. After a couple of days I saw an image of my Guruji Pramukh Swami Maharaj (BAPS) appear on the wall. I could feel my Guruji touching my feet and hands and after a day or two I was feeling better and started recovering.

After my transplant; my life has changed for the better. I have more energy to perform tasks which I could not

carry out whilst I was on dialysis. It has also improved my family life.
